LIGHTING FOR

TAP ROOM • COLD STORAGE • BOTTLING
BREWHOUSE • WAREHOUSE • OUTDOOR

4500K CCT (neutral) is the recommended color temperature for best batch observation – is Atlas' standard in all fixtures.

NSF & wet location rated fixtures • No harmful UV

BREWERY LIGHTING

INTERIOR

TAP ROOM • COLD STORAGE • BOTTLING • BREWHOUSE • WAREHOUSE

- Neutral color temperature (4500K) allows for easier batch observation
- No harmful UV rays that can affect perishable ingredients
- NSF & wet location rated fixtures for moisture from the brewing process
- Low heat emissions
- Go Green & Save Money
- Improve Light Quality
- Increase Worker Satisfaction

OUTDOOR

EXTERIOR WALLS • PARKING LOT • WALK WAYS

- Increase Curb Appeal
- Improve Safety
- Save energy

Whether you are just starting your own small brewery or you are in charge of a larger operation, there are a few multiple lighting aspects you need to consider.

Any location where perishables are being stored has its own unique lighting considerations. When you add in the delicate nature of brewing blends of sensitive hops and barley for beers and ales into the mix, brewery lighting can be complicated. Atlas' team of experts can help provide your team with the right lighting to decrease your costs, improve your production and appearance.
