### VACUUM AREA

Vacuums have become more of a focal point with the rise of express exterior sites, lighting them properly is a must. Vacuum lighting requires light intensity bright enough to cast light into a car and with a wide distribution so that the front seat, back seat and trunk of cars have light. A 18,000 lumen Type 3 LED area light on a 15- to 20-foot pole provide the appropriate amount of light.

# CAR WASH LIGHTING

By lighting your perimeter, vacuum bays and wash areas, you will make customers feel safe even at night.

## CALL FOR YOUR CONSULTATION TODAY

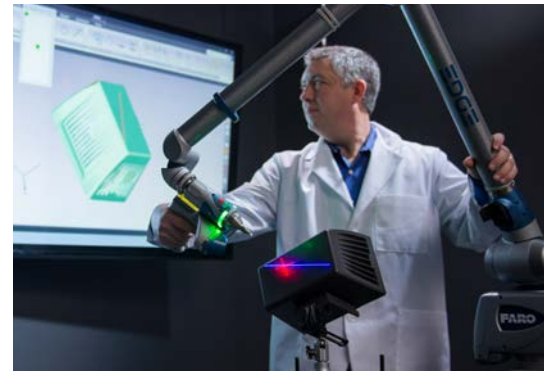

LEDs are a great option to make a carwash site stand out in crowded areas, communicate to customers that a site is open for business and remind customers that their vehicles need a wash. Further, LED lighting produces a crisp, clean light that creates a welcoming and safe environment for all wash customers.
