

PRECAST POLE BASES

FASTER, HIGH QUALITY AND CUSTOMIZABLE

► Faster and Easier to Install

Atlas Precast Pole Bases are conduit-ready and use less time, labor and materials than site-cast or poured-in-place methods.

► Consistently High Quality

Our pole bases are constructed under climate-controlled conditions to guarantee a high standard of quality and finish.

► Customizable to Your Exact Specs

We know one size doesn't fit all. Base diameter, length, bolt patterns, ground wire, and conduit options can all be customized to your specs.

A BETTER, FASTER WAY TO CONSTRUCT POLE BASES

1

Attach lifting bracket to pole base.

2

Lift pole base to vertical orientation.

3

Place into hole, run wiring through conduit.

4

Fill/tamp the hole and level the base.
